Water Bowsing Schedule

Last Update: **28 April 2020 (Version 2)**

Water Bowsing is meant to augment water supply deficit in different areas across Botswana.

Water Utilities Corporation (WUC) would like to thank and recognise the support made by Government Departments, Parastatals and the Private Sector in pledging their resources. WUC has received and continues to receive assistance ranging from water bowsers, flatbed trucks and water tanks to avail water to Botswana during this COVID-19 pandemic.
